

Four In A Row

- Cut the Calling Squares sheet into individual squares and put them in a hat
- Give each student a copy of the page of musical symbols.
- Allocate a different colored row on the musical symbols sheet to each student.
- Pick calling squares from the hat and read them to the students.
- Students should check off items from their row that match the calling squares.
- When they have checked off all 4 items from their row, they should shout "FOUR."
- Keep going until you called all the squares from the hat.
- Usually there are one or two students who won't have shouted "FOUR" even though you have called all the squares. This will help you to see which symbols they don't know the names of. 😊
